

MCCORMICK

McCormick Systems, Inc.

On Screen Estimating

McCormick Systems, the Nation's Leader in Estimating Software, is excited to announce an addition to its award winning line of products. McCormick Systems, in conjunction with On Center Software, has developed a seamless integration tool that allows you to bring takeoff generated in On-Screen Takeoff directly into McCormick. Spot and dot the drawings on screen (pdf, jpeg, tif, dwg and more) and with the click of a single button, add your selected takeoff into your McCormick. This interface allows McCormick users one more tool to increase their speed and accuracy of the estimating process.
