

Accu Pull Corporation

Accu-Pull, the time and money saving fish tape measuring tool

The next generation of fish tape in the hand of any electrician, technician, handy man or homeowner. Accu-pull is an innovative wire routing product that allows the user to know the exact length of the conduit and the wires needed to pull through. Patent # US D506939S, Accu-pull is made of molded plastic handle, high strength steel tape and strong plastic housing. This product is equipped with a built-in measuring system which saves you time and money. Accu-pull measuring fish tape has a comparable price to the standard fish tape with much more to offer. Accu-pull offers durability, remarkable performance and exceptional savings!
