

AMPROBE®

ACD-14 PLUS 600A Clamp-On Multimeter

The Amprobe ACD-14 PLUS 600A clamp-on multimeter features dual display that allows simultaneous reading of amperage and voltage. It features thinner jaws than standard clamp meters, allowing access to tight measurement areas while still accommodating conductors up to 28 millimeters. The compact meter measures AC current to 600A, AC and DC voltage to 600V, capacitance to 3000 μ F, resistance to 40M Ω , temperature (with Type-K thermocouple probe), and micro amps for testing flame sensors.
